

From humble beginnings to the industry-leading manufacturer of pesticide RMs, with more than 14,000 products serving the food, environmental and cannabis testing industries:
Here is our evolution.

1975

In Augsburg (Germany),
Dr Siegmund Ehrenstorfer set up his own
company concentrating on the production
of pesticide reference materials.
Dr Ehrenstorfer is born!

Introduction of specific pesticide
mixtures for EPA Methods

1992

Introduction of first stable
isotope labelled pesticides

1998

Augsburg and Charleston
production sites accredited to
ISO 17034

2017

Dr Ehrenstorfer
acquired by LGC

2014

Development of the largest GC & LC
pesticide mixtures on the market
GC PestiMix – 431 analytes in one kit
LC PestiMix – 739 analytes in one kit

2020

Today

World's leading producer of pesticide
and other organic reference materials –
offering over 14,000 reference materials
including 5,000 pesticide RMs

Looking Ahead

For nearly half a century,
Dr Ehrenstorfer has
consistently led the industry
in pesticide reference
materials. Today and
tomorrow Dr Ehrenstorfer is
committed to continuously
improving its products and
expanding its offerings by
launching hundreds of new
products every year.
