

OUR CUSTOMERS'
VIEWS ON THE
REVOLUTIONARY IMIX
SMART SOLUTIONS™

Saving valuable time &
increasing productivity

OUR REVOLUTIONARY iMIX RANGES, DEVELOPED WITH YOU IN MIND

Our ever-expanding portfolio of revolutionary iMix products maintains our high-quality, and accuracy of results, with drastically reduced testing times. Expertly developed to make your analyses easier and faster, we've pushed the limits of analytical chemistry to deliver mixes that offer optimal analyte elution and maximum stability.

Our market-first iMix Smart Solutions™ have been revolutionising our customers' work from day one. With a precise formulation that reduces complicated method development and dilution steps, and ISO 17034 accreditation for the most comprehensive Certificate of Analysis possible, iMix has taken accurate results to whole new levels.

Here are just some of the ways we've changed the face of testing for our customers.

REDUCING PREPARATION STEPS AND DELIVERING MAXIMUM RESULTS

**"PestiMix reduced our time, paperwork,
error and cost"**

Who they are

One of the largest producers of rice and pulses in India and the No. 1 speciality food brand in the US markets.

What they needed

With multiple matrices for pesticides, mycotoxins, PAH and trace metals analysis, they needed higher concentration neat CRMs to reduce preparation steps and get maximum compounds results.

What we delivered

A custom solution of ISO 17034-accredited materials that significantly reduced sample preparation time and expedited accurate results.

What our customers are saying:

"PestiMix not only saves us time, it also reduces human error in our sample preparation and cuts down on our paperwork. And with its multicomponent data in single format, we can get results within 30-40 minutes."

REDUCING WORKLOAD AND INCREASING PRODUCTIVITY FOR CULTIVATOR PHYTO LAB

**"Your tailor-made solution
reduces manual errors and
gives us a cost effective method
of achieving accurate results"**

*Sandeep Sharma, Head of Lab Operations,
Cultivator Phyto Lab*

Who they are

An industry-leading supplier of testing services for food and agricultural products, AYUSH & Cosmetics, Air, Water, Soil, Environment, and other hygiene standards.

What they needed

A solution that would reduce results deviation and help overcome the challenges of preparing their own mix standards for multiple compounds.

What we delivered

Ready-made, bespoke, ISO 17034-accredited mix standards that offered greater accuracy along with reduced production hours and costs.

What Sandeep Sharma told us:

"Your tailor-made solution reduces manual errors and gives us a cost-effective method of achieving accurate results. We've been able to cut our laboratory workload and increase productivity without investing hours and hours in making the mix."
